NEET Sample Practice Test

10 Questions | Physics, Chemistry & Biology | Total Marks: 40 | Total Time: 10 Minutes

Marking Scheme	+4 for correct, -1 for incorrect, 0 unattempted
Recommended Time	1 minute per question

Question Paper

Q1. (Physics) A body is projected vertically upward with speed u. The time taken to reach maximum height is:

Marks: +4 / -1 | Time: 60 sec

A) u/g
B) u/2g
C) 2u/g
D) g/u

Q2. (Physics) The SI unit of electrical resistance is:

Marks: +4 / -1 | Time: 45 sec

A) Ampere
B) Volt
C) Ohm
D) Watt

Q3. (Chemistry) Which of the following is the correct electronic configuration of Chlorine (Z = 17)?

Marks: +4 / -1 | Time: 60 sec

A) 2, 8, 7
B) 2, 8, 8
C) 2, 7, 8
D) 2, 8, 6

Q4. (Chemistry) The pH of a neutral solution at 25°C is:

Marks: +4 / -1 | Time: 30 sec

A) 0
B) 14
C) 7
D) 1

Q5. (Chemistry) Which type of bond is formed by the mutual sharing of electrons between two atoms?

Marks: +4 / -1 | Time: 45 sec

A) Ionic bond
B) Covalent bond

C) Metallic bond
D) Hydrogen bond

Q6. (Biology) The functional unit of the kidney is called the:

Marks: +4 / -1 | Time: 45 sec

A) Neuron
B) Nephron
C) Alveolus
D) Nephridium

Q7. (Biology) Which of the following organelles is known as the 'powerhouse of the cell'?

Marks: +4 / -1 | Time: 30 sec

A) Golgi apparatus
B) Ribosome
C) Mitochondria
D) Lysosome

Q8. (Biology) In humans, the process of formation of male gametes is called:

Marks: +4 / -1 | Time: 45 sec

A) Oogenesis
B) Spermatogenesis
C) Gametogenesis
D) Fertilization

Q9. (Biology) Which plant hormone is primarily responsible for promoting cell elongation and apical dominance?

Marks: +4 / -1 | Time: 60 sec

A) Cytokinin
B) Auxin
C) Gibberellin
D) Abscisic acid

Q10. (Physics) The dimensional formula of force is:

Marks: +4 / -1 | Time: 60 sec

A) [MLT^-1]
B) [MLT^-2]
C) [ML^2T^-2]
D) [ML^-1T^-2]

Answer Key & Explanations

Q1. (Physics) A body is projected vertically upward with speed u. The time taken to reach maximum height is:

Correct Answer: A

Explanation: At maximum height, final velocity $v = 0$. Using $v = u - gt$, we get $0 = u - gt$, so $t = u/g$.

Q2. (Physics) The SI unit of electrical resistance is:

Correct Answer: C

Explanation: Resistance R is defined by Ohm's law, $R = V/I$, and its SI unit is the ohm (Ω).

Q3. (Chemistry) Which of the following is the correct electronic configuration of Chlorine (Z = 17)?

Correct Answer: A

Explanation: Chlorine has 17 electrons, filled as 2 (K shell), 8 (L shell), and 7 (M shell), giving 2, 8, 7.

Q4. (Chemistry) The pH of a neutral solution at 25°C is:

Correct Answer: C

Explanation: At 25°C, pure water has $[H^+] = [OH^-] = 10^{-7}$ M, giving pH = 7, the neutral point.

Q5. (Chemistry) Which type of bond is formed by the mutual sharing of electrons between two atoms?

Correct Answer: B

Explanation: A covalent bond forms when two atoms share one or more pairs of electrons to complete their octets.

Q6. (Biology) The functional unit of the kidney is called the:

Correct Answer: B

Explanation: The nephron is the structural and functional unit of the kidney responsible for filtration and urine formation.

Q7. (Biology) Which of the following organelles is known as the 'powerhouse of the cell'?

Correct Answer: C

Explanation: Mitochondria generate ATP through cellular respiration, earning the name 'powerhouse of the cell'.

Q8. (Biology) In humans, the process of formation of male gametes is called:

Correct Answer: B

Explanation: Spermatogenesis is the process occurring in the seminiferous tubules of the testes that produces sperm cells.

Q9. (Biology) Which plant hormone is primarily responsible for promoting cell elongation and apical dominance?

Correct Answer: B

Explanation: Auxin promotes cell elongation in shoots and suppresses lateral bud growth, causing apical dominance.

Q10. (Physics) The dimensional formula of force is:

Correct Answer: B

Explanation: Force = mass x acceleration = M x (LT^{-2}) = [MLT^{-2}].
